Church Block, the principal scene and victim of Monday's calamitous fire, consisted of three handsome two story brick store houses, built six years ago upon the ground covered previously by the old Presbyterian church. The corner house belonged to Eckford & Bro., next house, to Honea & Son and next, to T. G. Elliott. The lire caught in the callar of Ecktord & Bro. An employee of this firm, Mr. R. B. Burdine, having gone into the cellar carrying a lantern for the purpose of getting a gallon or so of varnish. The varnish was so low in the barrel that it was necessary to tilt it forward, to do this and have light, Mr. B. set his lantern near by and proceeded to tilt the bar-rell, which slipped his hand, bulging forward, throwing the varnish over the lantern and adjacent flooring. It caught and burned like August stubble in a gale; indeed, it was with utmost difficulty that Mr. B. escaped. In forty minutes Eckford's house was in ruins, and the flames, though steadily combatted by the fire company, with all possible help from the citizens generally, had enwrapped the Honea house. At this time it seemed as if the whole town would be destroyed; a gale was blowing from the south, carrying intense heat and burning debris to the north side of the street, setting fire to the opposite houses,in many places, in one instance setting fire to a private dwelling-Mrs. Whitfield's-over a bundred vards away. It was a terrible moment for our tewn, and but for arduous and

and faithful work, its business houses would now be in ashes. In two hours the fire was under control -a herculean task, considering the entirely inadequate means at hand. The aggregate loss, over insurance, will foot up from \$12,000 to \$15,000. Eckford suffers most, Honea next, and other losses distributed to Elliott, Feldman, Rouselle, Mrs. Gillespie, Kimmell, Weiler, Haas & Kraus and Drs.

Greene & Sale. The colored fire company worked with fidelity and energy; the engine is perhaps good of its kind, but the kind is worthless and the company tacks organization. We noticed that there were too many captains, too many orders given at the same time. creating confusion and consequent ineffici-

block will be rebuilt at an early day, and we hope to see it spring from its ashes mere beautiful and imposing than ever.

The rulns of Monday's fire speaks loudly for an increased and better fire service. The colored company worked faithfully and bravely, but their means and organization were inefficient. The best drilled company in the world could do but little with the inferior engine and hose they had. Buy a steam engine and enlarge the reservoirs.

WOMAN. BETTER TRAN THE SMILES OF KINGS. To bring health and happiness to the nomes of suffering women is a mission be-ore which royal favor sinks into insignifi-

cance. What earthly benefaction can com-pare with one which protects from "That dire disease whose ruthless power "That dire disease whose ruthless power Withers beauty's transient flower?" which gives ease for pain, joy for sorrow, smiles for tears, the roses of health for the paller of disease, the light, elastic step for dragging weariness, nights of soft repose for heavy hours of tossing restlessness' bounding vigor for languishing dulness, the swelling lines of full grown beauty for the sharp and withered form of emaciation, a long life of mental, physical, social and domestic enjoyments for a few sad days of pain and gloom, ending in an early grave? Such is the mission, such are the results of Dr. J. Bradfield's Female Regulator, which is hence truly and appropriately styled "Wo-

CAMELS IN AMERICA.

Some twenty-five years ago a public spirited American brought to this country several pairs of camels, supposing they might be of value in crossing the arid plains of our Western and South-western country. But there was some disappointment as to other commercial availability, and so they were set free in the deserts of Arizona. They have increased very greatly in numbers, and the Indian make a business of catching them to sell to the owners of menageries. We are building railroads so rapidly to all parts of the country, that camels are not needed by us for the conveyance of freight, nor will they be of much use when the iron horse finds its way across the barren places of the Old World. It is an ugly animal to look upon, but the camel has certainly been a faithly friend to man, and has served him in good stead in desert countries where wide stretches of sand separated populous communities.—Demorcsi's Monthly for 5 29
